SUMMARY

With over 15 years of experience as a software engineer, I specialize in building scalable frontend applications, modern architectures, and AI-powered solutions. Experienced in leading technical initiatives, designing systems, and delivering high-quality products using emerging technologies.

Frontend Development: Expert in React, Next.js, TypeScript, and JavaScript, with strong experience building design systems, reusable components, and scalable UI architectures using Storybook, Redux, RxJS, Tailwind CSS, Radix UI, and Shadcn UI.

AI & Modern Development: Experience integrating AI-powered features to enhance user experiences, automate workflows, and improve application capabilities.

Backend & APIs: Experience with Node.js, .NET, GraphQL, REST APIs, and databases including PostgreSQL, MySQL, and MongoDB.

Headless & Deployment: Skilled in Sitecore XM Cloud, Contentful, Strapi, Next.js architectures (SSR/SSG), and deployments using Vercel Pro and Enterprise.

[!\[\]\(d3102649f02e825ddb76dc3de0190154_img.jpg\) RESUME](#)

SKILLS

- TypeScript, JavaScript, Node.js, React, Next.js, React Native, Ionic, Angular 1/2.
- AI integration and AI
- powered application development, improving user workflows and product capabilities.

- React ecosystem: Redux, Jotai, React Query, SWR, GraphQL, REST APIs.
- Reactive programming: RxJS, Observables, Promises, AJAX.
- Headless development: Sitecore XM Cloud, Contentful, Strapi (v3/v4).
- Extensive experience creating scalable UI libraries and design systems using Storybook.
- UI frameworks: Radix UI, Shadcn UI, Tailwind CSS, Chakra UI, Bootstrap.
- Styling technologies: Sass, SCSS, CSS Modules, Styled Components, BEM, Less.
- Next.js architecture: SSR, SSG, Server Components, i18n, NextAuth.
- Frontend tooling: Vite, Webpack, Gulp, Grunt.
- Databases: PostgreSQL, MySQL, MongoDB.
- SEO optimization and accessibility implementation (WCAG AA).
- Strong UI/UX background with experience using Figma, Adobe XD, Sketch, Photoshop.
- Experience working in macOS, Ubuntu, and Windows environments.
- Graphics and user experience design background.
- Currently learning Italian and Japanese.

WORK HISTORY

zondahome — *Software Engineer III*

May 2025

- Develop and enhance a CRM platform with a strong focus on frontend engineering, user experience, and modern web application architecture.
- Build scalable and maintainable frontend features using React, Redux, and RxJS, implementing reactive programming patterns and efficient state management solutions.
- Design and develop reusable UI components, improving application consistency, performance, and maintainability.
- Implement new product features and user-facing functionality based on business requirements and customer needs.
- Integrate and develop AI-powered features to enhance application capabilities, automate workflows, and improve user productivity.
- Collaborate with product teams, designers, and engineers to deliver intuitive, high-quality user experiences. Optimize frontend performance, troubleshoot complex UI issues, and improve application reliability.
- Contribute to frontend architecture decisions, code quality improvements, and best development practices. Work with backend services built on .NET by creating integrations, consuming APIs, and supporting end-to-end application functionality.
- Participate in the complete software development lifecycle, including planning, development, testing, deployment, and continuous improvement.

mergeworld.com — *Full Stack Developer*

Set 2021 – Apr 2025

- Working with an amazing group of people.
- Responsible for creating demos and full products for clients.
- Create Figma prototypes.
- Integration with sitecore xp and xmcloud sites.
- integration with microsoft sharepoint.
- Ionic Apps.
- Create design systems for backend integration.
- React, Next.js, Storybook, Nodejs.
- PC and macOS environments.

hangarworldwide.com — *Technology Lead*

Jan 2020 – 2021

- Career developer
- Work on ni.com projects
- Create unit tests for ni.com projects
- Custom storybook components (angular and vanilla javascript)
- Create a small design system for hangarworldwide.com
- Create programs for people level skills
- Talk directly with clients
- Responsible for creating demos for clients
- Follow Agile methodologies (Azure)
- Create Figma prototypes
- Help with ni.com design system

18techs.com — *Full Stack Developer*

Apr 2016 – 2019

- Work on OrTracker React native app, Web App, and Node API.
- Work for mergeworld.com.
- Create multiple static and dynamic WordPress sites.
- Create style guides for multiple sites.
- Create SPA using react and angular.
- Migrate www.wunderground.com to angular
- Work with multiple APIs
- Server side rendering with Expressjs
- Unit test with jasmine
- Use of Agile methodology (Jira)
- D3 and D3 server side rendering
- Foundation

hangarworldwide.com — *Front End Lead*

Jan 2009 – Mar 2016

- Generated a methodology for Code Reviews at least once a month within the Front-end department.
- Fostered an environment to lunch and learn at least once a month

- Acted as a leader in terms of technology. Manage deliverables, raise flags (risks), and ensure that the projects came on time and in compliance with the estimate.
- Scheduled and conducted one on one at least every 15 days with all my team members.
- Created tasks for people who were available.
- Collaborated with the Technology Directors, Project Managers, Creative Leads, and Account leads to design, develop and deliver digital marketing projects on mobile, web, and desktop platforms.
- Functioned as a leader and coordinator of the Application Developers, Web Developers, and Database Developers.
- Ensured successful involvement of Project Management, Quality Assurance, and Release Engineering team members.
- Assisted on the architecture and development of multiple projects.

Organizational Consulting Group S.A.

— *Programmer (visual 6.0 and C#)*

Oct 2008 - Jan 2009

coopecorl.com — *IT Guy*

Mar 2008 - Oct 2008

- Designed Web
- based (Java/JSP) Internet applications linked to Oracle databases.
- Analyzed business, functional, and technical requirements.
- Technical Support.
- IT tasks like windows updates, windows problems, new installations, users' specific requests, etc...

ACADEMIC BACKGROUND

Universidad Fidelitas, Costa Rica

— *Bachelor's in Computer Science*

2005 - 2008

Universidad Latina, Costa Rica

— *Electrical and Electronics Engineering*

2011 - 2012
